Experience

DASSAULT FALCON JET
UX Designer | October 2019 - Present
As a part of the user experience team at DFJ, my projects vary in scope and size. I've done small merchandising designing as well as email templates, environmental graphic designs, and internal communications document designs. I also assist with project management tasks such as planning, vendor management, and budgeting.

E&J GALLO WINERY
Web Designer | August 2018 - September 2019
As a part of the D360 team at E&J Gallo Winery, I focused on website design. The process included sitemapping, wireframing, interactive mockup and presentation to the client. I also helped other teams including branding, print production, social media, and the photography team. For the end of 2018 I worked at their creative facility in Modesto, California and now I freelance for them from Ohio.

UC ECONOMICS CENTER
Intern Designer | August 2017 - August 2018
University of Cincinnati's Economics Center focuses on financial and economic education and research. With the economics department, I visualize and organize large amounts of detailed research data. Working with the researchers here I am able to create comprehensive hand-outs and booklets that a non-research based audience can understand quickly and easily. I have also done simple animations and digital pdfs with the UC Economics Center.

LANDOR TOKYO
Intern Designer | January 2018 - April 2018
A global design agency, Landor specializes in branding and print based design.
As an intern with Landor I was able to explore branding and package design. Much of my time was spent collaborating with my coworkers on a variety of projects such as drink packaging, business branding, event branding, and more! Working one on one with design directors and members of other departments, I also contributed to a handful of inhouse designs.
